

HELP SAVE THE LAPTOP

Your laptop needs help. Most of the world's laptops are made in the Yangtze River region. But the pressure of global demand has left the region's natural resources stretched and unable to cope. In partnership with the Chinese government, WWF helped create a sustainable development model for the region, which is home to the iconic giant panda, as well as some 480 million people. Together, we are revitalizing an ecosystem that can support both people and nature. Help us look after the world where you live at panda.org/50

Fishing boat, Hunan Province, China.
